

# Dreamdoors to Your Soul's Path

*with Sabina Poulsen and Marianne Verny*

*July 10th - 12th 2015 in the Czech Republic (near Prague)*

*In this Seminar, we invite you to work with yourself, offering and guiding you through different dream-doors to access and explore areas of your unknown soul-territory through Altered States of Consciousness.*

*Our dreaming is like a vast river, flowing anyhow, whether we are aware of it or not. Certain techniques like "journeying with the drum", the "medicine walk" in nature or "vector walking" allow us to follow that dreaming by allowing altered states to rise. A certain ritualized structure of time and space creates safety, a beginning and an end. This way, we stay awake while navigating the dreaming flow.*

*Every participant chooses a personal focus like a dream, the childhood dream, a body symptom or any other disturbing issue, that seems to be important and deals with it through these different approaches. In the end, each participant will mend the different strings to a connecting spiderweb telling a story of his/ her soul-path.*
